NATURAL BEAUTY

The Roosevelt Collection masterfully crafted in tribute to the hardwood industry features live sawn hardwoods, a traditional sawing method that produces beautiful and unique grain patterns. It's naturally durable, dimensionally more stable and the most environmentally friendly cut of hardwoods. A live sawn floor works with both modern and traditional interiors providing a desirable and sought after organic element to a home's decor.

BENEFITS

Finish: Aluminum oxide fortified. 25 year wear warranty.

Structure: Slice cut face provides the highest possible stability while maintaining a traditional sawn cut visual. Lifetime structural guarantee.

Clean Air: Meets or exceeds carb II air quality requirements for your home and the environment.

QUALITY

Hardwood Timber: Naturale Elegance sources the hardwoods used in the construction of our floors wear layer from sustainable hardwood supplies.

Base Layer Materials: Eucalyptus veneers make up the centerply in our hardwood flooring. As one of the strongest and most stable species available, eucalyptus is rapidly renewable and the most environmentally friendly wood product on Earth because it is the fastest growing plant on record. Eucalyptus flooring can be twice as hard as oak floors and expand at half the rate of most hardwoods, making the wood fibers in eucalyptus ideal for flooring.

Air Quality: Cold press melamine glue process adheres and hardens the veneers while providing the added advantage of increased moisture resistance. This process meets or exceeds carb II requirements for air quality.

Slice Cut: Slice cut hardwood allows for a thick face cut while producing traditional hardwood visuals. Slice cut engineered floors use hardwood materials more efficiently while providing the highest possible stability in a hardwood plank.

Eco-Aluminum Oxide Finish: Nanotechnology incorporates the fortifying mineral of aluminum oxide into the protective top coats of finish providing a 25 year wear warranty.

WE'RE WITH YOU ALL THE WAY

WARRANTY

Lifetime Limited Residential Warranty on Product Structure*

Naturel Elegance Floor products are engineered for better dimensional stability. If under normal household conditions (30-55% RH, 60-80 degrees Fahrenheit), the product was to experience structural failure, Naturel Elegance will repair, replace or refund at our sole discretion. See Maintenance and Warranty Guide for full details.

Lifetime Limited Residential Finish Warranty*

Under normal residential conditions, along with proper maintenance, Naturel Elegance finishes will not wear through, peel, or separate from the planks, when properly maintained with authorized maintenance products. See Maintenance and Warranty Guide for full details.

**Warranty valid for original purchaser only. Warranty is non-transferable. See Maintenance and Warranty Guide for full details.*

COLOR, GRAINING & NATURAL CHANGES

Wood is a natural product that features distinct color and graining. Each board is unique in its characteristics and will vary from piece to piece. Each board can vary from a clean to rustic visual and contain small to large filled knots and splits, sap wood, and a high contrast within the natural and lighter stained visuals. These subtleties may become more distinct over time due to exposure of direct sunlight. Occasional rearranging of furniture and rugs will help reduce the potential effects of the sun.

MAINTENANCE

Taking proper care of your hardwood floor is essential if you want them to last. To keep your floors in best condition, install felt protector pads on the bottom of all furniture and place mats or rugs at all entrances. Sweep, vacuum, and dust mop regularly. Wipe up spills immediately with a dampened cloth and follow up with a non residue forming hardwood specific floor cleaner (Arboritec cleaner is recommended). Avoid using wet mops, household dust treatments, petroleum-based cleaner, or steam cleaners.
